

July 30, 1943.

Mr. L. C. Bishop
State Engineer
Cheyenne, Wyoming.

Dear Mr. Bishop:

re: General

Your letter dated July 22, relating distribution of water on Burnt Fork River in Utah and Wyoming, is received. It is, indeed, unfortunate that the rights of Utah users from this stream have not been adjudicated. It would be well, as you suggest, to have a representative from this office visit the area and adjust diversions so as to get the water users by for the present season.

It is my thought to begin, as soon as possible - probably later in this season - the adjudication of these waters in the State of Utah. However, I am faced with the situation that the only person available to do this work is now under the doctor's care. It will therefore be some time before it will be possible for him to take to the field. I assure you that he will be sent to the area as soon as his health will permit.

Yours very truly,

Ed. H. Watson,
STATE ENGINEER.
